

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. **THE** following small collection was made in the year 1818, and sent home to the Library of the East India House, whence, at the recommendation of Dr. WILKINS, it was transferred back to China, and ordered by the Honorable Court of Directors to be printed at the Company's Press, the want of types in England (a want that has already been supplied in France) rendering such a step necessary towards the printing of any work which contained a large proportion of the Chinese Character. The first object of the Compilation (as set forth in the title page) was to afford some assistance to Students of the Language; but there are perhaps other Persons to whom it may not be altogether devoid of interest.

As among the sayings contained in the present volume it is observed, that a man's conversation is the mirror of his thoughts, so the maxims of a people may be considered as a medium which reflects with tolerable accuracy the existing state of their manners and ways of thinking. At the same time, I would, in its application to the Chinese, qualify the observa-

tion so far as to say, that they very seldom act up to the full extent of the spirit in which some of their purer and wiser precepts are framed : and that they are more like the Athenians who *knew* what was right, than the Spartans who *practised* it. This fact, however, by no means invalidates the truth of the general position, that there must ever be a close connection between the popular maxims, and the manners of a nation. They have in reality a reciprocal action on each other ; the modes and sentiments of one generation giving birth to certain maxims, which maxims contribute in their turn to influence and mould the manners of the next.

Considered in this connection, the following Proverbs and Moral Sentences may possess some claim to the attention of the curious. If in the original language they can pretend to any merit of their own, it arises chiefly from the brevity and pointedness of expression,—a merit which wholly evaporates in the process of translation. Denuded of their native dress, they in most instances degenerate into little better than mere truisms;—truisms, however, which while they may excite the scorn of the ignorant and the unthinking, are of such utility and importance in the conduct of life, as to have made it the study of the Moralist, in every country, to inculcate them with the greatest effect ; by clothing them in such forcible and striking language, and condensing them into so laconic a form, as

vii.

might best allure the attention, and enable the memory most easily to retain them. I have observed in another place,\* that the language of the Chinese is well adapted to this purpose.

Their most ancient Moral Maxims, (and especially those of Confucius) bear a strong resemblance to the sententious sayings of the Sages of Greece. In the earlier stages of society, before the diffusion of book learning, and when the teachers of truth addressed themselves orally to their disciples, such pithy and condensed sentences were not only best calculated to excite immediate attention, but also the most likely to be remembered by the hearers. Being treasured up and handed down to posterity, they have at length become so many texts or theses for the more Prosaic Discourses of modern times; and accordingly, I think it will be found, that the earliest records of every country abound most with this species of sententious wisdom. Long trains of reasoning and laboured deductions are suited neither to the inclinations nor capacities of men in the infancy of society; nor were they required, when every word that fell from the lips of the teacher was received with submissive reverence by his disciples. The process of argumentation becomes necessary, only when

the diffusion of knowledge, and the existence of conflicting opinions, weakens the force of authorities, and makes it incumbent on the professor to demonstrate the truth of every thing he advances.

There can be little doubt of the antiquity of the greater number of Maxims contained in this Volume. Their abstract truth or falsehood is a matter of no consequence to the European reader, to whom they are offered merely as specimens of national literature. As the Chinese, however, generally quote them with respect, and as the greater portion have a moral tendency, I have not scrupled to bestow on the collection the title of 書文賢 Hien-wun-shoo, 'A book of virtuous lore.'

\* The absurd fables, related in the Chinese books of Ancient History, tell very much against their fidelity, and afford a strong antidote to the implicit belief, with which the Jesuitical accounts of Chinese antiquity have been listened to. In fact, their most ancient historical work *extant*, (the *Chun-tseu*, of Confucius) is not older than the history of Herodotus, and *not so old as Homer's poems*.

The artful are loquacious, the simple are silent : the artful toil, the simple enjoy ease : the artful are rogues, the simple virtuous ; the artful are miserable, the simple happy. Oh ! that all in the empire were artful and simple : punishments would then be abolished. Superiors would enjoy tranquillity, and inferiors would be obedient. The goodness of a house does not consist in its lofty halls,  
but in its excluding the weather : the fitness of clothes  
does not consist in their costliness, but in their make  
and warmth ; the use of food does not consist in its  
rarity, but in its satisfying the appetite : the excellence  
of a wife consists, not in her beauty, but in her virtue.
